Your Partners in Drug Development and Safety

Specialist services to the pharmaceutical industry spanning all phases of clinical trials, post-approval pharmacovigilance and medical information.
Specialist Drug Development and Safety Solutions

Founded in 1997, Ergomed is dedicated to the provision of specialist services to the global pharmaceutical industry.

Today, Ergomed supports pharmaceutical companies with services spanning all phases of clinical trials, post-approval pharmacovigilance and medical information.

Our business includes a full range of high-quality clinical research and clinical trial management services and internationally recognised expertise in orphan drug development together with an industry-leading suite of specialist pharmacovigilance solutions.

By providing this full-service offering, Ergomed enables emerging and established life sciences companies to meet their regulatory obligations, maximise their drug development success and therefore their product value.

16 offices worldwide
53 countries with active clinical trials
800+ professionals
600+ studies completed
100+ supporting products in over 100 countries
180k+ adverse event cases processed per year.
Ergomed, our Clinical Research Organisation (CRO) provides complete Phase I-IV clinical development and trial management services, assisting clients by providing complete solutions tailored to their unique requirements.

With experience in over 600 trials, Ergomed has planned, managed, monitored and reported clinical trials with a range of technologies that include small molecule drugs, monoclonal antibodies and other targeted agents as well as cancer vaccines, immunotherapy, radioactive agents and photodynamic therapies.

Assisting clients with project directorship, project management, regulatory affairs monitoring, safety and medical monitoring, data management, biostatistics, medical writing, site management support and study physician support.

- Site management program specifically designed to increase study performance
- Specialist expertise in orphan drug development
- Therapeutic specialisations: oncology, respiratory, neurology and orphan.

20+ years’ experience  25% staff with PhD or MD

Discover the Orphan Advantage

PSR is the leading expert in assisting biotech and pharmaceutical companies in orphan drug development and supports the Ergomed global CRO offering.

Our orphan disease toolkit reflects a genuine family and patient approach to recruitment and re-intention. Our close links to patient advocacy groups maximise our partner’s chances of success.

PSR is specialised in designing and executing complex clinical development programs requiring innovative regulatory and clinical approaches in Europe and the US.

Through our site management model and study physician team support, we find hard to locate patients around the globe and work with the investigative sites, creating the best designs to maximise clinical programs and registries.

- Thought-leaders in the orphan drug community
- True family and patient centricity and Patient Organisation Advisory Board
- True patient centricity and Patient Organisation Advisory Board
- Access to global and hard to find patients in key geographical areas.

10+ years’ experience

130+ orphan projects
